

NEWLY DIAGNOSED CARE QUESTIONS

YOUNG ADULT CANCER

How do you feel about today's appointment?

What is the best course of treatment for this cancer at my age? Is there a clinical trial available.

When do I need to begin treatment and get a genetic test?

What are the side effects of my treatment plan? When can they start and how will they be managed?

Will treatment impact my fertility? If so, which specialist will you be referring me to?

How often will I have treatment? Do you require that I take time off of work and/or school or will you work around my schedule?

Where will my treatments take place? Is there a young adult program or patient navigator on site?

How best can I prepare for treatment and manage side effects after treatment?

Who should I call if I need to discuss symptoms after treatment?
